API Documentation - AiFriendBusiness

Your gateway to seamless business integration, enhanced productivity, and efficient management.

Introduction

Welcome to the AiFriendBusiness API documentation! Our platform empowers businesses with tools for enhanced productivity, efficient management, and seamless integrations with various applications and services.

Integrations

- ### Sync with Google

  Integrate with Google Calendar, Gmail, and Drive to streamline productivity:

  - **Google Calendar:** Automatically sync meetings, tasks, and deadlines to keep your schedule organized.
  - **Gmail:** Manage emails, send automated replies, and integrate communication workflows seamlessly.
  - **Google Drive:** Share files effortlessly, collaborate in real-time, and store documents securely.

- ### Facebook Marketing

  Take control of your Facebook campaigns with advanced tools:

  - Set up and manage ad campaigns directly from the dashboard.
  - Track campaign performance and key metrics in real-time.
  - Optimize targeting and engagement strategies to maximize ROI.

- ### CRM Tools

  Integrate with leading CRM platforms like Salesforce and HubSpot:

  - Manage customer relationships and monitor sales pipelines.
  - Track leads, automate follow-ups, and streamline sales processes.
  - Enhance team collaboration with shared insights and contact management.

- ### E-commerce Platforms

  Connect with Shopify and WooCommerce for seamless e-commerce operations:

  - Automate inventory management to keep track of stock levels.
  - Monitor sales performance and generate detailed analytics reports.
  - Provide better customer experiences with integrated order tracking.

- ### Payment Gateways

  Integrate with Stripe, PayPal, and other payment processors to manage transactions efficiently:

  - Securely process payments for products and services.
  - Generate automated invoices and receipts for transactions.
  - Track payment history and manage refunds with ease.

- ### Social Media Management

  Streamline your social media strategy with tools for Instagram, Twitter, LinkedIn, and more:

- Schedule and automate posts across multiple platforms.
- Analyze audience engagement metrics to refine content strategies.
- Respond to comments and messages directly from a unified dashboard.

- ## Analytics Tools

  Integrate with Google Analytics, Mixpanel, and similar platforms for actionable insights:

  - Track user behavior, website traffic, and conversion rates.
  - Generate custom reports to monitor business performance.
  - Leverage data to make informed decisions and optimize strategies.

- ## Project Management

  Connect with Trello, Asana, and Monday.com to enhance team collaboration:

  - Streamline project workflows and assign tasks effectively.
  - Track project progress with visual boards and timelines.
  - Collaborate across teams with centralized project updates.

- ## Cloud Storage Solutions

  Integrate with Dropbox, Box, and OneDrive for secure file management:

  - Upload, share, and manage files across your organization.
  - Collaborate on documents in real-time with teammates.
  - Ensure data security with advanced encryption and permissions.

- ## Cryptocurrency Wallets

  Integrate with MetaMask, Trust Wallet, and Ledger for advanced crypto management:

  - Securely manage cryptocurrency transactions and portfolios.
  - Monitor market trends and asset performance in real-time.
  - Access enhanced security features for asset storage and transfers.

Authentication

Access to the AiFriendBusiness API requires authentication via an API key.

Steps to Obtain an API Key

1. Create an account at AiFriendBusiness.
2. Navigate to the "Developer Dashboard" after logging in.
3. Generate your API key under the "API Access" section and keep it secure.

Using the API Key

Include the API key in the request headers for all API calls:

```
Authorization: Bearer your_api_key
```

API Endpoints

1. Add Cryptocurrency Wallet

Endpoint: /api/v1/wallet/add

Request:

```
 POST /api/v1/wallet/add
 Authorization: Bearer your_api_key
 Content-Type: application/json

 {
   "wallet_name": "My Bitcoin Wallet",
   "wallet_address": "your_wallet_address",
   "currency": "BTC"
 }
```

Response:

```
 {
   "status": "success",
   "wallet_id": "12345",
   "message": "Wallet added successfully."
 }
```

2. Execute Trades

Endpoint: /api/v1/trade/execute

Request:

```
 POST /api/v1/trade/execute
 Authorization: Bearer your_api_key
 Content-Type: application/json

 {
   "wallet_id": "12345",
   "trade_type": "buy",
   "currency": "BTC",
   "amount": 0.5,
   "price_limit": 30000
 }
```

Response:

```
 {
   "status": "success",
   "trade_id": "67890",
   "message": "Trade executed successfully."
 }
```

3. View Portfolio and Trading History

Endpoint: /api/v1/portfolio

Request:

```
 GET /api/v1/portfolio
 Authorization: Bearer your_api_key
```

Response:

```
{
  "portfolio": [
    {
      "currency": "BTC",
      "balance": 1.2,
      "value_usd": 36000
    },
    {
      "currency": "ETH",
      "balance": 10,
      "value_usd": 15000
    }
  ],
  "trading_history": [
    {
      "trade_id": "67890",
      "currency": "BTC",
      "trade_type": "buy",
      "amount": 0.5,
      "price": 30000,
      "status": "completed"
    }
  ]
}
```
